

## MOUNT MARY COLLEGE CAMPUS MASTERPLANNING

Milwaukee, WI

Located on the western edge of the City of Milwaukee, the historical Mount Mary College Campus is set in a pastoral "classic" quad campus arrangement and is located within a semi-urban context. This masterplanning effort grew out of a detailed examination of the existing conditions and a rigorous study of historical precedent and existing traffic patterns.

The goals of the masterplan were to establish gateways and arrival points, reinforce quadrangles and the "historic core" of the campus, focus future development around small "activity nodes," create promenades and vistas, ensure sustainable future development, create barrier-free access, encourage pedestrian and bicycle circulation, increase peripheral parking and to develop "connected" buildings.

**Completion:** 2012

**Client:** Mount Mary College
